		3-4	\$125.00
		5+	\$150.00

**\*The maximum amount to be paid for all FMS services cannot exceed \$165.00.**

If the FMS provides payments through more than one of the models above for a participant, then the maximum rate for that participant cannot exceed the highest cost model for the total number of services. For example, if a participant is using five services, and the FMS is a “bill payer” for the two services and a “co-employer” for three services, the maximum rate charged to the participant cannot exceed \$165.00 per month.

**\*\*FMS as Bill Payer: (also known as the Fiscal Agent model)**

A participant may choose this model of FMS provider when goods or services are purchased from a business. The FMS providing services in this capacity writes checks and pays for goods and services listed in the IPP. No employer/employee relationship exists between the FMS, the service provider, or the participant. The business is responsible to provide the items or workers and the FMS provider writes the check for the goods or services provided. The business maintains the employer/employee relationship with any workers and therefore is responsible for all applicable employment laws and taxes and to obtain appropriate insurances (i.e., worker's compensation).

**Participant and FMS as Co-Employer:**

A participant may choose this model if they want to share some of the employer roles and responsibilities with an FMS. While the FMS provider in this model is the employer of record, the participant maintains the ability to hire and terminate employees with input from the FMS provider. The FMS provider maintains the primary employer liability and required insurances. The FMS also assists by verifying provider qualifications and processing payroll.

**Participant as Sole Employer: (also known as the Fiscal/Employer Agent)**

A participant may choose this model if they want to be the direct employer of those providing services. The FMS providing services in this model assists the participant to abide by all applicable employment laws, verifies provider qualifications and processes payroll. **The participant is required to obtain any necessary insurances related to employment (e.g., worker's compensation).**
